

CLOUD MIGRATION

The future of small and medium business technology that will save you money and increase efficiency.

CLOUD MIGRATION

Companies are starting to utilize cloud computing in higher concentrations. The recent boom in the capabilities of utility computing in the cloud presents many small and mid-sized businesses with alternative ways of substantially enhancing productivity anywhere there is Internet access. Cloud computing presents solutions for many of your business' problems; from e-mail, to communications, to a full-scaled hosted infrastructure. In this way cloud computing is presenting companies of all sizes considerable benefits.

HOST YOUR SERVER IN THE CLOUD

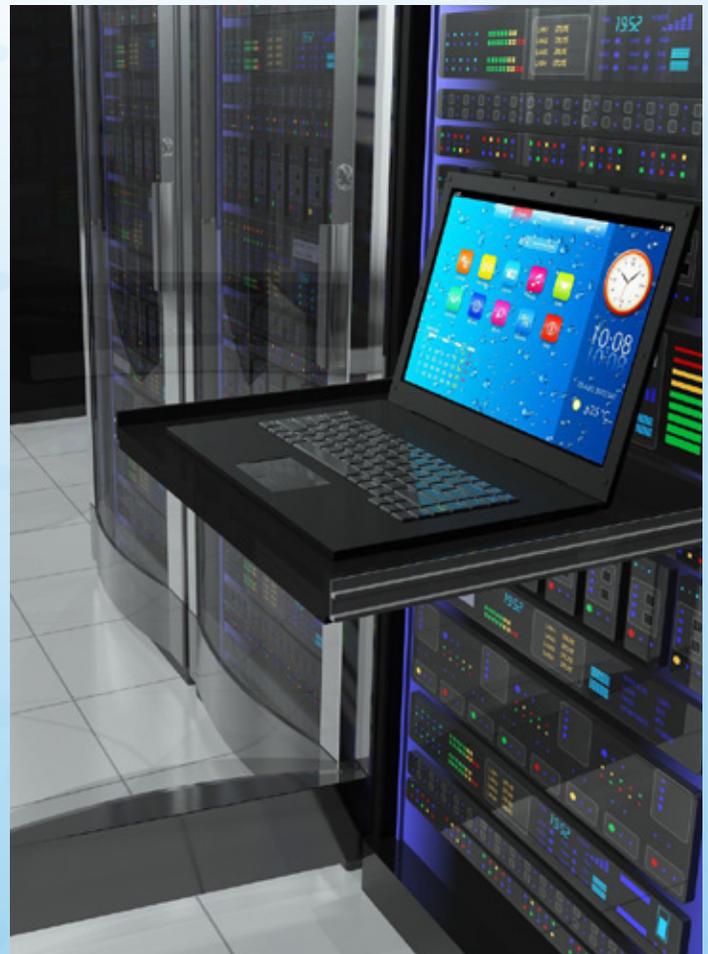

Take your server to the cloud and eliminate hardware and utility expenses.

The cloud is everywhere. Many businesses are unaware of the benefits that cloud computing can offer in the form of server and infrastructure hosting. Many small and mid-sized businesses can see benefits from integrating Valor Technologies' hosted solutions into their company computing strategy.

At Valor Technologies, we deliver efficiency. Some of the benefits that hosting your server and other critical computing components in our reliable and expertly-managed data center include:

- Less hardware to maintain
- More space in your office
- Considerable reduction in utility costs
- Reduction in overhead
- Professional support

By choosing Valor to host your company's infrastructure, you can achieve optimal levels of reliability and stability, while minimizing downtime. We ensure that your data is redundantly backed up, with integrated anti-virus and security protections that keep your computing infrastructure safe.

▲ VIRTUALIZED DESKTOP SOLUTIONS FROM VALORTECH

A cloud-based computing platform designed specifically for your business.

Today's workers need more from their computing platforms. They need them to be consistent and redundant and, most importantly, available from wherever they are. At Valor Technologies, we offer a virtual desktop infrastructure (VDI) platform that can transform your business by providing the custom computing interface, application deployment, and cost reduction that is attractive to both the modern company and the modern worker.

▲ VIRTUALIZE YOUR COMPUTER HARDWARE

Get the most out of your company's computing resources by consolidating your hardware.

With all information technology professionals searching for ways to help their organizations reduce capital spending and improve efficiency, most professional institutions have started moving sections of their business computing to the cloud. By virtualizing your company's computing infrastructure, Valor Technologies technicians are routinely able to substantially cut your enterprise's energy and maintenance costs. Our proficiency with our assessment and virtualization presents companies like yours with sustainable IT road maps that were never considered viable before.

▲ CLOUD BACKUP, SECURITY, AND FILE SHARING- PROTECTING YOUR BUSINESS IN THE CLOUD

The proliferation of dynamic cloud solutions can be a major benefit for your business.

Many organizations look to cloud computing as a potential solution to addressing the rising costs of internal IT. Since cloud solutions are generally billed monthly, the cost becomes an operating expense. To avoid overwhelming capital outlays, companies have begun utilizing cloud-based systems for hosting their communications (phone, email) and even their entire computing infrastructure. This shift has driven a large number of vendors to shift their primary computing offerings to the cloud, allowing you options that you never had before. By doing this, they have been able to develop and integrate more dynamic solutions that present companies like yours with substantial value.

Consider how much your organization spends on the management and maintenance of your IT infrastructure. If you could get a fully-managed and current cloud solution for a fraction of the cost you are currently paying, wouldn't you jump at that opportunity? The trusted IT professionals at Valor Technologies offer enterprise file sharing and secure cloud backup solutions that present organizations like yours with options that weren't available to them just a short time ago.

▲ MICROSOFT AZURE | GET MICROSOFT'S CLOUD COMPUTING PLATFORM & INFRASTRUCTURE FOR YOUR BUSINESS

Integrate the services and applications you depend on with a scalable cloud platform.

Many modern businesses are searching for ways to enhance the mobility of their business. Integrating technology systems that expand their access to mission-critical data is one effective way to improve operational agility. With so many cloud solutions on the market, it can be difficult to determine what your business needs in a dedicated cloud computing platform.

For your cloud needs, Valor Technologies offers Microsoft's Azure platform. Azure offers a quality cloud interface that is detail-oriented and allows your organization to integrate many options, including analytics, data sharing, and application deployment in a flexible and dynamic online environment.

▲ CLOUD HOSTED VOIP SOLUTIONS

The traditional business telephone solution is showing its age. Due to the Internet and online technologies like the cloud, organizations are finding it difficult to justify keeping

a traditional phone line for their communications solutions. Considering how difficult it is to scale a traditional PBX phone system to accommodate for growth, businesses want a more dynamic solution that's in line with their current and future needs.

With a cloud VoIP solution from Valor Technologies, your business can finally cut expensive telephone services out of your budget and replace them with flexible solutions designed to address your organization's communications needs. By taking advantage of a service that you already use - the Internet - you can secure the communication platforms your company requires while removing unnecessary service costs.

▲ CENTRESTACK - CLOUDIFY YOUR IT

Make any server a cloud server.

At Valor Technologies, we pride ourselves on our ability to provide our clients with the right technology services to fit their needs. Many businesses today have begun to incorporate public cloud computing services as they look to manage technology costs and see rapid and sustainable returns from their technology investments. Our Centrestack cloud computing solution allows any organization to "cloudify" their current on-site IT infrastructure, saving organizations substantial costs that implementing their own secure private cloud solution can present.
