

FOR IMMEDIATE RELEASE

## **ValorTech Achieves SOC 2 Type II Compliance, Reinforcing Commitment to Data Security and Privacy**

Milwaukee, WI – 8.23.24 – ValorTech, a leader in advanced technology solutions, proudly announces its achievement of SOC 2 Type II compliance. This milestone demonstrates ValorTech's ongoing commitment to ensuring the highest standards of data security, privacy, and operational excellence for its clients.

SOC 2 Type II compliance is recognized as the gold standard for data security, requiring organizations to adhere to stringent controls over the protection of customer data. Developed by the American Institute of CPAs (AICPA), the SOC 2 Type II audit evaluates an organization's information systems over an extended period to ensure that they meet rigorous criteria across the five Trust Service Principles: Security, Availability, Processing Integrity, Confidentiality, and Privacy.

Bryan Sevenser, CEO at ValorTech, commented on the achievement: "Earning SOC 2 Type II compliance is a significant accomplishment for ValorTech and underscores our dedication to protecting our clients' data with the highest levels of security. Our clients can have full confidence that our systems and processes meet the industry's most rigorous standards."

The successful completion of the SOC 2 Type II audit reflects ValorTech's ongoing investment in robust security practices and its commitment to operational transparency. This compliance ensures that ValorTech's clients, which include enterprises across various industries, can rely on the company's technology solutions to handle sensitive information with the utmost care.

ValorTech delivers their clients military-grade IT security, resources and performance. Their complete set of professional information technology offerings include managed IT services (Monitoring, user support, system support), managed security services (Data, network, people), data center services (Co-location, public, private, hybrid), professional services (network & infrastructure, talent services, cloud migration, consulting) and technology investments (Gear, software, licensing).
